About

I am a programmer focused on building reliable and secure software.

I have been actively studying and working with various technologies for over 5 years.

This CV is intentionally anonymous and concise.

All my projects, practical experience, and code samples are publicly available on my GitHub and on this website.

I am comfortable working both independently and as part of a team, contributing to development, testing, analysis, and problem-solving.

Strengths

- High persistence and focus on finding solutions
 - Strong analytical thinking
 - Goal-oriented and self-driven
 - Able to work as a developer, tester, or analyst within a team
 - Comfortable with complex and low-level problems
-

Technical Skills

Programming Languages

- Python
- Node.js
- Go

- C / C++
- Rust

Domains

- Cryptography
- Information Security
- Data Recovery

Tools & Environment

- Git
 - Wireshark
 - Linux
 - Bash
-

Projects

I primarily work on personal and open-source projects.

All projects, source code, and documentation are available:

- On my GitHub profile
- On this website in the /prod section

No commercial work experience is listed here — my work is best evaluated directly through the code.

Education

Not listed intentionally.

This CV is focused on practical skills and real-world projects.
